It was launched at SR Engg College

Warangal offers the best education after Hyderabad as it has eminent colleges offering a wide variety of courses, said PR Minister Errabelli Dayakar Rao after launching the PGDM-IEV (Innovation Entrepreneurship & Venture Development) course at SR Engineering College on Wednesday.

The course, which is being offered from this year for the first time in India, has been approved by the All India Council of Technical Education (AICTE).

“It provides an opportunity for students to work on their start-up ideas and do their masters degree in management simultaneously. SRiX is well-equipped to help students prepare their prototypes, software or tech platforms. Each student will have a mentor to guide them,” said Sreedevi Devireddy, CEO of SRiX.

Chairman of SR Educational Society A. Varada Reddy said that providing the best opportunities to students has been their goal behind launching the PGDM-IEV. Principal V. Mahesh said it was a proud moment for the college to be chosen by the AICTE.
